---

Print out these pages to make a line-following track for your Scribbler Robot.

Please follow these guidelines:

- Print pages in BLACK.
- Print on WHITE paper.
- Print with your printer's BEST QUALITY setting.
- Print on ONE SIDE of the paper only.

This file contains one copy of each shape. You may print out more copies of each shape as needed for the track you design.

When using the Scribbler Line-Following Demo, please remember:

- Place your tracks on a HARD, FLAT, SMOOTH surface. Line following may not work well on carpet.
- If your paper is thin, dark surfaces may show through the paper. This may make the black line harder for the Scribbler to see. If this happens, use heavier paper, or move your track to a lighter-colored surface.
- The Scribbler robot's line sensors are precisely tuned to focus on the floor. If you raise or lower your Scribbler, it may not be able to see the line. Therefore, do not take the tires off of the wheels, since that positions your Scribbler too close to the floor.

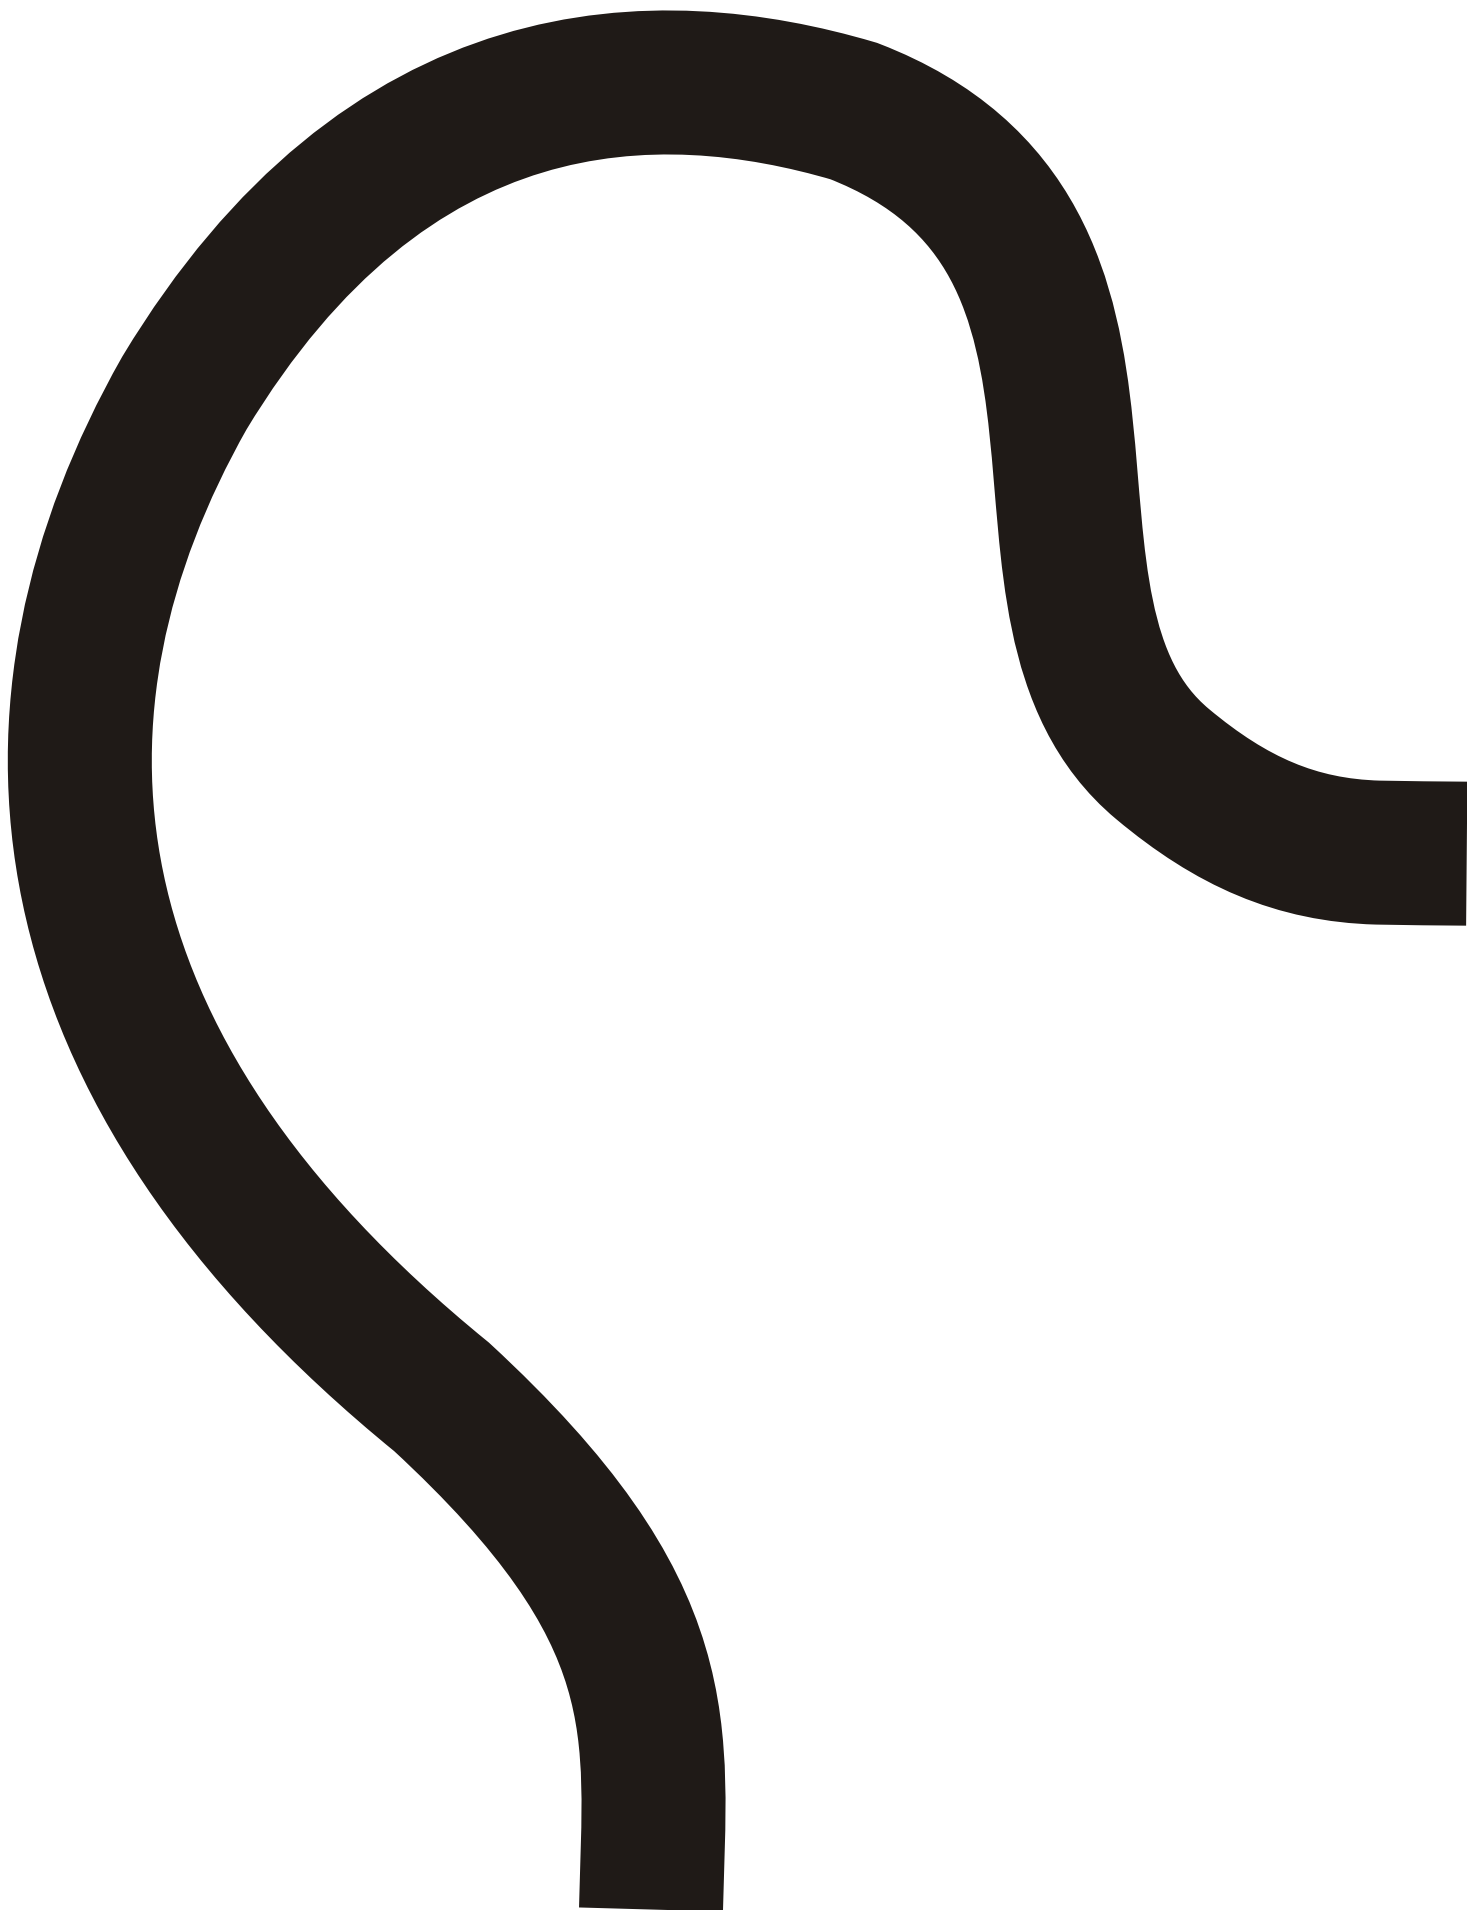

If you need assistance, please make use of the contact information at the top of this page.

Line Following Code
